New Opportunity: Publishing Articles for the Investment club!

- Write finance-related
 editorials/articles/social media posts
- After proper editing and fact-checking, we will publish them on our website and/or our social media!
- Opportunity to get your name out there and boost your resume

This idea is still in the works, so we want your feedback! Scan the QR code to fill out an interest form.

Do you have any other ideas? Do you have any suggestions or feedback for the aforementioned idea?

5 responses

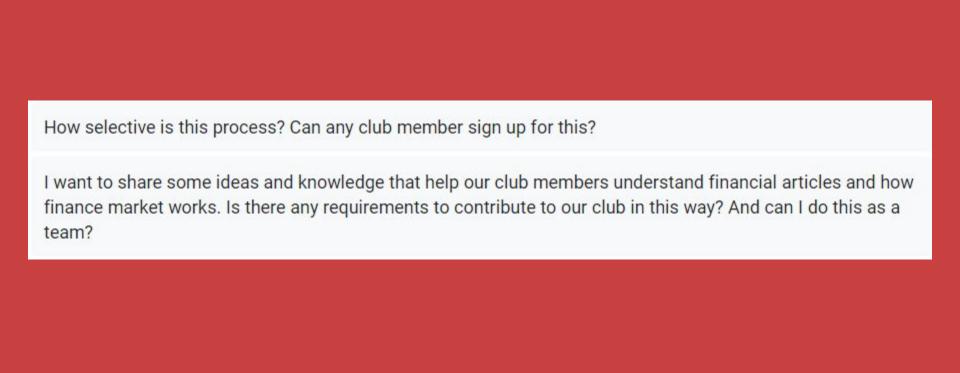

I think the investment club should start extra social events as well.

Maybe stock analysis

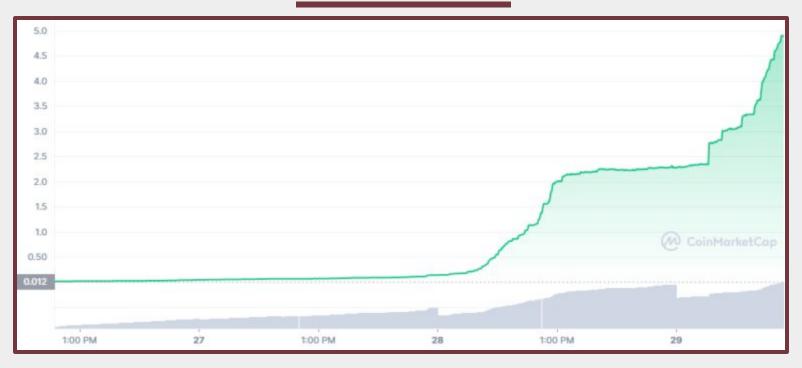

Have a weekly newsletter where multiple people work on it together and share their ideas.

Once there is enough information collected between the articles and posts, there could be an archive/webpage where publications are organized by date or topic, so the library could grow over the course of multiple years and the archive would be more comprehensive. Anyone should also be able to contact the editors/writers about topics they would be interested in or if they have their own blurb they would like to include or their own take on a topic that we are working on or might consider writing about. Publications in that way can become a type of forum or community built project, pooling knowledge and ideas from all of the enthusiastic club members.

Offering people to submit their own articles alongside ones published by the club

Will you buy?

EXCLUSIVE

Why One Fed Official Is Ready to Stop Raising Rates

Philadelphia Fed President Patrick Harker said he thinks the central bank can likely wait until early next year to decide whether rapid rate increases have done enough to keep inflation heading lower.

What is Risk?

Risk is uncertainty!

Unsystematic Risks: Diversifiable

- Management
- Liquidity (Ease of converting into cash)
- Regulation
- Credit risk
- Operational risk
- Legal risk
- Commodity risk
- Model risk
- ... many many more

Systematic Risks: "Non-Diversifiable"

- Market risk
- Interest rate risk
- Political risk
- Inflation risk
- War risk
- Legal risk
- Currency risk
- Model risk
- ... many many more

Measuring & Mitigating

Measuring:

- Standard/Semi Deviation
- Uncertainty of returns
- Value at Risk
- Probability of worst case scenario
- Max drawdown
- SWOT analysis
- etc..

Mitigating:

- Spread money throughout assets that don't move together
- Don't put all your eggs in one basket
- Stop loss orders
- Long/short strategies can weather systematic risk

The Cockroach Portfolio

Goals:

- Withstand extreme economic events while thriving in positive conditions
- Consistent returns
- Structured for deflation, inflation, growth, and declines

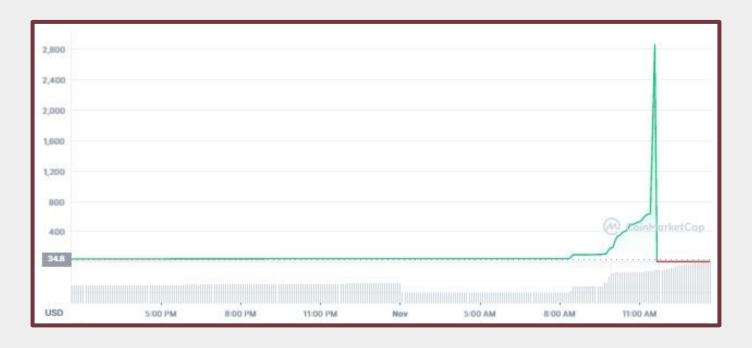

Methods:

- Multiple levels of diversification
- Country, time, managers, correlation, and more
- Thorough understanding of correlation dynamics
- Tail hedging
- Buying OTM options
- Leverage!
- No effort to predict the future, rather be adaptable to all scenarios

Backtest Results

lol rip

Scams

Types:

- Pump & Dumps
- Rug Pulls
- Courses, Stock picks
- Commodity scams
- Many strategies many hedge funds make more in fees than in capital gains

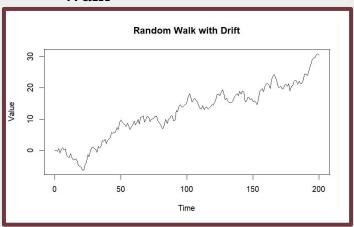

Avoid Scams:

- Do your due diligence.
 Investing is <u>hard work</u>.
- If it sounds too good to be true..
- If you don't see how you can lose money, you will lose money.
- History

Market Intuition

Random Walk Hypothesis:

- Yesterday's value + random
- Events occur randomly, market participants react immediately -> Random Walk

Efficient Market Hypothesis

- Markets reflect all known information & potentially private information.
- You cannot outperform with public information
- 3 versions Weak,
 Semi-Strong, Strong
- Markets become more efficient as time passes
- Intraday trading is EXTREMELY efficient

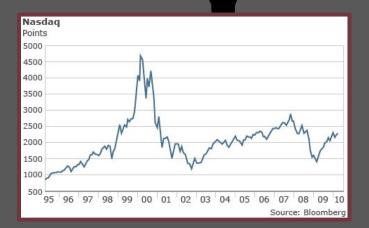

"All models are wrong, but some are useful" - George Box

Market Intuition

Arguments Against EMH:

If markets are efficient,
bubbles and bursts
shouldn't occur.

Dotcom Bubble & Burst

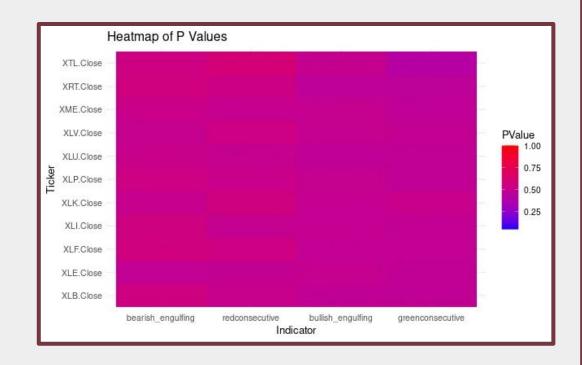

Other Arguments:

- Renaissance Tech & other successful firms
- Autocorrelations in assets & success of autoregressive models
 - Anomalies such as momentum, value, etc.

"All models are wrong, but some are useful" - George Box

Don't Trust Everything You Read

- Many websites and traders promote candlestick patterns to trade
- "Using Bullish Candlestick Patterns to Buy Stocks" on Investopedia
- I tested the significance of returns surrounding candlestick patterns. You can read about it here.
